Profile

Full-stack web developer with eight years of experience across a variety of frameworks and platforms. Currently focused on javascript development, I am looking for opportunities to work and grow with companies that maintain high standards and work on impactful projects they believe in.

Work History

NuCivic / Granicus – Lead Developer (2015 - 2017)

Worked with Agile scrum teams to develop product features, bug fixes, and improvements on DKAN, the company's core product offering. Designed and built React Dash, a front-end visualization framework used to build data visualization dashboards for clients. Acted as Lead Developer for multiple data visualization projects for the state of Georgia.

Level Legal – Lead Developer (2014 - 2016)

Worked with clients, product owners, and designers to architect and developed an online legal negotiation framework using BackboneJS, JQuery, and NodeJS.

Post Graduate Medicine / Physicians Sports Medicine – Lead Developer (2013 – 2014)

Managed feature development, maintenance, and deployment processes for a suite of online peer-reviewed medical journals built in Drupal 7.

Recent Projects

Philly 311 / Philly CAP Open Data Explorers (2018)

Designed and built data visualization dashboards for exploring open data while prototyping a product / software offering for interra.io. **Technology:** React, NodeJS, Postgres, GraphQL, Serverless / AWS

Bird-Dog Nation (2018)

Built parcelize.com, an event classification system using current machine learning technology in NodeJS. **Technology:** NodeJS, MongoDB, Serverless / AWS

Brightpoint Health (2018)

Led SEO and feature development for clinical and organizational expansion around substance use treatment and services. **Technology:** Drupal, Javascript, Pantheon, JSON Schema

Horsephotos (2018)

Led product iterations and third party API integrations for the online store. **Technology:** React, Flux, Stripe, Auth0
